

As you know, with XYZ Online Payroll, you have always been able to complete your payroll in three simple steps – taking you less than two minutes!

1. Enter your hours.
2. Preview your payroll.
3. Approve it.

Now it can all be done with 1-click.

It literally takes only seconds. If you pay employees the same salary and hourly wages every pay period, 1 click is ideal for your business.

It's easy to set up.

1. Go online and log into your payroll account.
2. In the company section, go to the default setting.
3. Store your commonly used payroll information.
4. Turn on the default and 1-click settings.

When it's time to run payroll, simply go to your payroll account center and click "1-click" instead of the "run payroll" button. Then you're done.

You still receive an email confirmation that your payroll was processed, and your online reports become available within minutes.

Payroll has never been quicker or more convenient.
